

Product code: SCP201g

Description: Analog cartridge, common ground (positive polarity) high current (40A peak - 20A cont)

New product / replacement: Replaces SCP01g

Difference from replaced item: refined behaviour at high current: can drive most existing slot cars motors even under extremely high loads

- Operating even better at high current.
- May be used with any kind of motor for electric tracks, without important power lacks.
